EDUCATION

BINUS University

Bachelor of Science — Summa Cum Laude (GPA: 3.94 / 4.00)

Sep 2021 – Aug 2025

- Course: Computer Science
- Streaming: Digital Creative Technology (Full-Stack — AI Development)

EXPERIENCE

PT Kalbe Farma Tbk

Software Engineer

Jun 2025 – Present

- Serving as technical lead for a legacy project, Regulatory Document Management System which is currently undergoing **Computerised System Validation (IQ/OQ/PQ)** while overseeing the qualification process and mentoring 4 interns across 2 consecutive hiring cycles. Support the debugging, feature implementation, integration, and deployment during the process.
- Leading a Supply Chain Management project starting from the **core code of the project**, R&D, architect, and built the ELT pipeline (CMP → Cold Data Storage → Hot Data Storage (MPS, Intermediate, MRP) across **3 BUs**, compressing hundreds of thousands of raw planning records into actionable supply chain entries by transforming into JSONB; mentored 3 interns across 2 consecutive hiring cycles for development and post-production hardening.
- Lead, architect, and mentor the Clinical Trial Management System **product architecture and requirements definition for a multi-tenant platform** with a customised services for each platform to serve 2 subsidiary tenants and potentially grows, to support across 4 research lifecycle phases; R&D of the AI/RAG pipeline (pgvector, Gemini, OpenAI, etc.) which serves as the USP of the platform and support the clinical research process; collaborating cross-functionally with the Product Manager and ensuring the development of the product met the user expectations. Mentored 2 interns and 1 staff during the process of the development.
- Architect and mentor of Calendar of Events Application to manage and book the calendar of Board of Directors that must be filled throughout all Corporate Function and SBUs; mentored 1 intern to support the development of the project.
- Continue to serve the second phase of Radiology Information System to build several of new features, pages, refactored legacy code to maximise the performance of the webapp for server-side data fetch, and removing dead code.
- Built and shipped an internal Chatbot Application as sole engineer for a ~1,000-user business unit; supports the development of the Backend API best-practices for authentication, infrastructure, and deployment in AKS. Structured handoff to incoming staff with active mentorship to maintain full system continuity.
- Engineered **150+ enterprise automation flows** in Power Automate and integrate it to Microsoft Office services, SharePoint, and external APIs across 2 divisions, eliminating manual approval and notification chains.
- Managing the deployment of the apps in **Azure Kubernetes Services** and **OpenShift** infrastructure by ensuring the reliability of the app are adequate for development, staging, and production environments.
- Introduced **Gunawan Protocol** to support Agentic Development Lifecycle standardisation as a projects-wide standard.
- Supporting the hiring process of new batch of interns, developed the learning modules of new interns, and mentor the assigned intern for further learning process in real-world case including handling the PR workflows, architecture decision or technical justification across **7 interns across 2 cycles**.

PT Kalbe Farma Tbk

Software Engineer — Internship

Feb 2024 – Jun 2025

- Refactored front-end architecture of Radiology Information System for 3 major product features in Next.js + Supabase, improving Lighthouse performance scores from 20–30 to ~70–90 — a **3–4× improvement**.
- Automated cross-division business workflows in Power Automate, reducing process cycle time by **10×**.
- Introduced Negative Space Programming as a team-wide defensive coding standard following R&D and PoC delivery.

INDEPENDENT VENTURES

Digital Twin Stealth Company

Researcher and Product Owner – Part-time

2026 – Present

- Synthesised 16 academic papers across 3 research waves and produced a competitive brief on 7 LLM gateway products to define the architecture and positioning of a LLM routing platform in Rust.
- Oversaw research integrity and build correctness across 3 development milestones for the routing product, including architecture validation, algorithm review, and pre-launch quality assurance across the full routing stack.

B2C Media Stealth Company

Technical Lead

2026 – Present

- Architect, R&D, mentor, and QA of a consumer mobile app, developed the core engineering standards and backbone of the app, architecture, frameworks, and infrastructure.

COMMUNITY & THESIS

Axolotl — Your Caregiver (Thesis Project)

AI Engineer, Software Engineer, QA, DevOps

2024

- Built and validated an AI-powered patient diagnostic system — responsible for ML model development, end-to-end business flow testing, DB data-flow verification, and backend pipeline optimisation.
- Standardise the sign-up workflow to be automatically saved across all devices.
- Ensuring the reliability of the API and the WebApp during the production level of UEQ and testing to the end-user and deployed the application using Google Cloud Run

Google Developer Student Clubs BINUS Malang

Chapter Lead

Aug 2023 – Jun 2024

- Scaled chapter from ~20 to 500+ members — 25× (2,500%) growth in one year — by redesigning community onboarding and expanding cross-university partnerships.
- Led a 26-person core team across 3 divisions (Product, Public Relations, Design); set OKRs, tracked KPIs, and maintained alignment with GDSC global programme standards.
- Organised 5 local and 3 international events with global partners, reaching 1,000+ total attendees.

SKILLS & INTERESTS

Languages & Frameworks: TypeScript, Python; Next.js, React, Node.js, Deno, FastAPI

Cloud & Infrastructure: Azure Kubernetes Service (AKS), OpenShift, GCP, Docker, Kubernetes

DevOps & Security: CI/CD (GitHub Actions), Git, Rolling Deployments, CSP/HTTP Header Hardening, RLS

Data & Integration: PostgreSQL/MySQL, Supabase, Power Automate

AI & ML: Claude, Cursor, Azure OpenAI, RAG Architecture, Vector Database

QA & Compliance: CSV (IQ/OQ/PQ), k6, Lighthouse, Agile/Scrum

Languages: Bahasa Indonesia (Native) | English (Professional) | Mandarin (Elementary)
